

Dear Carnival Guest:

Carnival is dedicated to offering a quality cruising experience to our guests with disabilities. Our ships provide a team of dedicated service professionals and a variety of accessible features to make your voyage a fun, relaxing and a memorable experience.

Carnival makes available a portable room kit which includes a visual-tactile alert system that provides alerts for door knocking, telephone ringing, alarm clock and smoke. A TTY (teletypewriter) is also available to interface with Guest Services, available 24 hours a day.

A safety briefing video is televised in all staterooms, throughout the cruise, with open caption. Carnival created TV content has closed captions. Additionally, when available through our service provider, closed captions are offered for certain in-cabin TV programs and movies. Should you require closed captioning for our outdoor movies, please contact our Guest Services team once on board. Other important information can be found in the Fun Times (daily newsletter).

Listen Technologies (infrared system) are available fleet wide and can only be used to amplify the sounds of the shows. You may request them on board with Guest Services. Please note, guests who do not return the borrowed headsets will be charged \$150.

Sign language interpreters are available upon request, only on cruises that depart/return from a U.S. port, for guests who use sign language interpreters as their primary means of communication. In order to ensure interpreting services are provided as requested, kindly provide us with 30 days' notice.

Please complete the following information below and return to our Guest Access Department at [access@carnival.com](mailto:access@carnival.com) so we can best serve your needs.

We look forward to welcoming you aboard the Fun Ships® of Carnival Cruise Line.
